Nintendo®

Message from the President

Over the past two decades, the video game industry has grown into a respected entertainment medium, with annual sales rivaling box office receipts for the movie industry. Nintendo continues to create unique software-driven entertainment by ensuring that our hardware and software are created with only one goal in mind, an enjoyable playing experience for all. This mindset has enabled Nintendo to create products and characters beloved by people around the world.

The video game industry has grown tremendously, but market expansion efforts have stalled because the development of games that are more complex and graphically intense has been the focus of game companies for too long. Declining game software sales in the North American market last year illustrate that this slowing of game sales is now problematic outside the Japanese market as well.

With these circumstances in mind, Nintendo has implemented a strategy which encourages people around the world to play video games regardless of their age, gender or cultural background. Our goal is to expand the gaming population.

The first tangible product that comes from this strategic direction is the Nintendo DS, which employs unique features like dual-screens, a touch-screen, wireless communication and voice recognition technology to take gaming in a new direction. On the software front, Nintendo has created dedicated game titles, under the heading "Touch! Generations", which give veteran game players fresh gaming experiences while allowing those who have never played video games to easily enjoy the experience.

As a result, one of these titles, Nintendogs, has sold 6.65 million copies globally in the last fiscal year. Also, the total sales of the two Brain Age (Brain Training) titles and Big Brain Academy are 5.1 million units in the Japanese market alone. These software are being enjoyed by older demographics and female audiences, as well as traditional game players. Simultaneously, Nintendo created a free, safe and easy-to-use wireless gaming service exclusively for Nintendo DS called, Nintendo Wi-Fi Connection. The rapidly expanding popularity of our service is also contributing to the expansion of the gaming population.

Nintendo will continue to leverage our exceptional strength, which is derived from the combination of our world-class hardware design and our unrivalled internal software development teams, to accelerate market expansion by creating software for an ever-expanding audience, and intuitive hardware like the Nintendo DS and the upgraded Nintendo DS Lite. In the home console market, Nintendo will launch Wii and establish a new standard in game control using the unprecedented Wii Remote, which will make game control intuitive for all. Wii also features WiiConnect24, which allows Wii to maintain a wireless connection, with extremely low power consumption, even when the Wii system is not in active use. Nintendo will encourage Wii users to turn their system on every day by delivering a new experience each time the system is used. This will be yet another method to help Nintendo expand the video game population.

From Wii to DS Lite, Brain Age to Mario, Nintendo is committed to providing video gaming experiences that are enjoyable for everybody in the household.

Nintendo DS

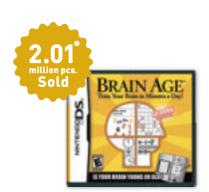

The numbers shown above are consolidated sales in units (* show sales in units in Japan) for the fiscal year ended in March, 2006. 6.65 million pcs. represent the combined total of the entire Nintendogs series.

History of Nintendo

1889

Fusajiro Yamauchi, great-grandfather of Hiroshi Yamauchi (the former President and current executive adviser), began manufacturing and selling Japanese playing cards, Hanafuda (flower cards), in Kyoto, Japan.

1902

Started manufacturing and selling the first western-style playing cards in Japan.

1947

Established Marufuku Co., Ltd.

1949

Hiroshi Yamauchi took office as President.

1951

Changed company name to Nintendo Playing Card Co., Ltd.

1952

Built headquarters in Kyoto, Japan and consolidated the manufacturing facilities.

1953

Became the first company to succeed in mass-producing plastic playing cards in Japan.

1959

Started selling cards printed with Walt Disney characters, opening a new market for children's playing cards in Japan.

1962

Listed stock on the second section of the Osaka Securities Exchange and on the Kyoto Stock Exchange.

1963

Changed company name to the current Nintendo Co., Ltd. Started manufacturing and selling games and toys in addition to playing cards.

1969

Built Uji plant in Kyoto, Japan.

1970

Stock listing was changed to the first section of the Osaka Securities Exchange. Started selling the Beam Gun series, employing opto-electronics.

1973

Developed the Laser Clay shooting-range system to succeed bowling as a major pastime.

1974

Developed image projection system employing 16mm film projector and entered into the arcade business. Began exporting systems to the U.S. and Europe.

1979

Developed Nintendo's first home video game machines, TV Game 15 and TV Game 6.

1980

Established a wholly owned subsidiary, Nintendo of America Inc. in New York. Developed and started selling GAME & WATCH product line, the first portable LCD video games with a microprocessor.

1981

Developed and began distribution of the coin-operated video game Donkey Kong.

1982

Established Nintendo of America Inc. in Seattle, Washington and merged the New York subsidiary into it.

1983

Started selling the home video game console Family Computer System employing a custom CPU (Central Processing Unit) and PPU (Picture Processing Unit). Listed stock on the first section of the Tokyo Stock Exchange.

1985

Released the Nintendo Entertainment System (NES), the U.S. version of the Family Computer System, in the U.S. The NES game, Super Mario Bros. became a smash hit around the world.

1986

Started selling the Family Computer Disk Drive System to expand the functions of the Family Computer System in Japan. Released NES in Europe.

1987

Released the Legend of Zelda in the U.S.

1988

On-line stock brokerage services utilizing the Family Computer Network System are started in Japan jointly with Nomura Securities. Enlarged Uji plant and built Uji-Ogura plant in Kyoto, Japan. Nintendo of America Inc. publishes the first issue of Nintendo Power magazine.

1989

Introduced Game Boy, the first portable, hand-held game system with interchangeable game paks, in Japan and the U.S.

1990

Nintendo enters the 16-bit console market with the release of the Super Famicom in Japan. Established Nintendo of Europe GmbH in Frankfurt, Germany. Released Game Boy in Europe.

1991

The 16-bit Super Nintendo Entertainment System (Super NES), along with Super Mario World, is released in the U.S.

199

Super NES released in Europe. Nintendo of America Inc. develops portable Fun Centers to help the Starlight Children's Foundation bring happiness to hospitalized children by allowing them to enjoy their favorite video games during hospital stays.

1993

Established subsidiaries in France, UK, the Netherlands, Belgium, Spain and Australia. The Nintendo Gateway program is introduced to provide Nintendo entertainment to airline passengers and hotel guests in the U.S. Built Uji-Okubo plant in Kyoto, Japan.

1994

Released the Super Game Boy, a peripheral for the Super NES, which enables Game Boy software to be played on TV screen. Released Donkey Kong Country for Super NES that uses proprietary Advanced Computer Modeling (ACM) graphics. Uji, Uji-Ogura and Uji-Okubo plants received ISO-9002.

1995

Started selling SatellaView adapter for Super Famicom in Japan, enabling the system to receive digital data from broadcast satellite.

1996

Launched Nintendo 64 in Japan and the U.S. The first software title, Super Mario 64, is proclaimed by many as "the greatest video game of all time!" Nintendo introduces the Game Boy Pocket, a sleeker, 30-percent smaller version of the world's most popular hand-held video game system. Pokémon Red & Blue for Game Boy are introduced in Japan.

1997

Nintendo introduces the innovative Rumble Pak attachment for the Nintendo 64 controller which enables game players to feel vibrations during gameplay. Nintendo 64 hits the European market. In Japan, Nintendo introduces the Nintendo Power system to convenience stores where game players can rewrite their Super Famicom game content. Pokémon TV series starts in Japan.

1998

Nintendo introduces Game Boy Color along with innovative devices called the Game Boy Camera and Printer, bringing new life to the longest running hit in the history of interactive entertainment. Pokémon, a breakthrough game concept for Game Boy, is introduced overseas and generates an international craze to catch 'em all! Pokémon the 1st movie is released in Japan. Nintendo introduces Hey You, Pikachu! in Japan with Nintendo 64 VRS, the first Voice Recognition System for console video games. Nintendo introduces Pokémon Stadium for Nintendo 64, which can make use of the 64GB Pak to transfer game data from a Game Boy cartridge to the Nintendo 64 console to be shown on the TV screen. Released the Legend of Zelda: Ocarina of Time" for Nintendo 64 worldwide.

1999

Game Boy Color games, Pokémon Gold & Silver, are introduced in Japan. Randnet DD, joint venture with Recruit Co., introduced "64DD" peripheral for Nintendo 64.

2000

Game Boy sells its one hundred millionth unit. Introduced Kirby's Tilt'n Tumble Game Boy game, the first video game software with "motion sensor" technology in Japan. Pokémon Crystal Version for Game Boy Color is introduced in Japan. The headquarters of Nintendo Co., Ltd. are relocated from the Higashiyama-ward to the Minami-ward of Kyoto, Japan.

2001

Started selling Mobile Adapter GB system in Japan, which links Game Boy Color and Game Boy Advance to cell phones. Launched Game Boy Advance worldwide. The new version of Game Boy employs a 32-bit CPU and can generate 32,000 colors simultaneously on the screen. Launched Nintendo GameCube in Japan and in the U.S. e-Reader, which scans special barcodes printed on paper cards, is introduced as a peripheral for Game Boy Advance. Introduced Nintendo GameCube Game Boy Advance Cable to connect Nintendo GameCube with Game Boy Advance

2002

Nintendo GameCube hits the European and the Australian markets. Satoru lwata takes office as President of Nintendo Co., Ltd. Introduced Pokémon Ruby & Sapphire for Game Boy Advance.

2003

Launched Game Boy Advance SP, equipped with front-lit screen, rechargeable Lithium-Ion battery, and compact folding design. Introduced Game Boy Player, which enables Game Boy software to be played on the TV screen. Established the Tokyo Software Designing Department to facilitate development in Tokyo. Began an online membership service, Club Nintendo. iQue (China) Ltd., a China based affiliate introduced the iQue PLAYER in China

2004

Launched the Game Boy Advance software Classic NES Series. The hand-held gaming device Nintendo DS, which opened up a new style of entertainment with its dual screens, touch control, wireless communication, and voice recognition technology, launched in Japan and in the U.S.

2005

Launched Nintendo DS in Europe and in Australia. Launched Game Boy micro, a lightweight version of the Game Boy Advance equipped with a back light screen, worldwide. Kicked off Nintendo Wi-Fi Connection, the wireless internet service for the Nintendo DS which has three key elements; "easy, safe and charge-free". Introduced Touch! Generations titles, aimed at expanding the user base. Among these titles, Nintendogs cultivated a new user demographic. Also from the line-up, Brain Age: Train Your Brain in Minutes a Day, coupled with its sequel version, and Big Brain Academy, which formed a new brain training genre, were released in Japan.

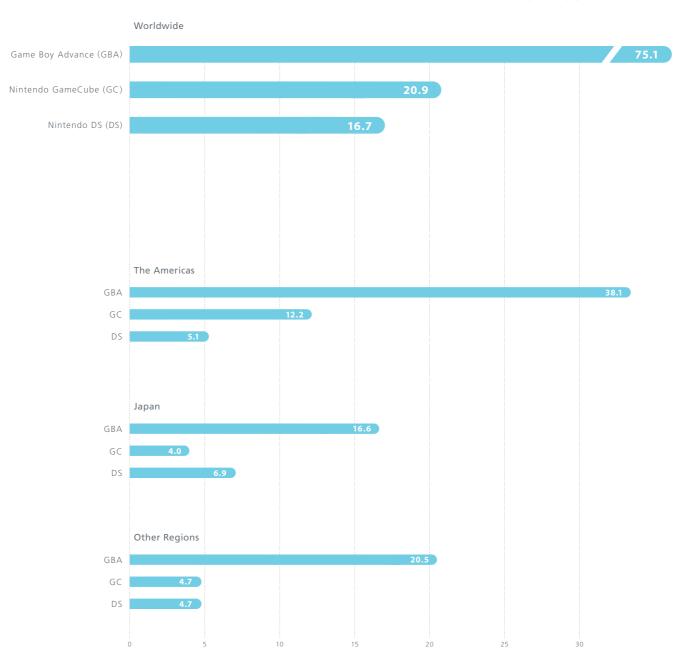

2006 (~ March)

Launched Nintendo DS Lite, a smaller and lighter version of the Nintendo DS equipped with a brighter screen, in order to meet various consumer preferences in Japan.

Analysis of Operations and Financial Review

Overview

The video game industry has developed as one of the few entertainment fields which was launched and driven by Japan. Success of the industry in the early years was dependent upon increasingly spectacular graphics and more complex games. In recent years, however, the traditional success formula of developing splendid and complex games has become less productive.

Nintendo's strategy over the past year has been to expand the gaming population by introducing "Nintendo DS", a handheld gaming device equipped with a touch screen and microphone port that enables intuitive game play, along with wireless communication capability. These features have made it possible to introduce software innovations that expand the definition of video games. New user demographics, including seniors and females, have been cultivated by introducing a software lineup known as "Touch! Generations". "Touch! Generations" titles offer an entertaining experience that provide a fresh sensation to skilled gamers while at the same time, making the experience easily accessible to those who were not familiar with video games in the past. Nintendo will continue to develop the "Touch! Generations" initiative (which created a new flow in the world of video games) while at the same time expanding its software lineup into various new fields.

"Nintendo Wi-Fi Connection", a wireless internet service for the "Nintendo DS", was recently introduced and has three key elements; "easy, safe, and charge-free". "Nintendo Wi-Fi Connection" quickly gained popularity and has been accepted by a broad range of people.

In addition to the original "Nintendo DS", Nintendo expects to further increase "Nintendo DS" hardware sales with the addition of "Nintendo DS Lite". "Nintendo DS Lite" launched in March 2006 in Japan and is a lighter and brighter version of the "Nintendo DS" to meet various consumer preferences.

During the calendar year 2006, a new gaming console "Wii" (pronounced "We") is scheduled for launch. With its unprecedented controller, "Wii" aims to set a new standard as a video game interface which allows the whole family to enjoy it.

Revenue and Expenses

In the handheld game business, "Nintendo DS" and its new model "Nintendo DS Lite" sold a total of more than 16 million units on a worldwide basis in just over sixteen months since launch. "Nintendo DS" is selling at a faster rate than any other gaming device, especially in Japan. "Nintendo DS" software has also enjoyed a boost in sales as the "Touch! Generations" titles, aimed at expanding the user base, have sold exceptionally well. Among these titles, "Nintendogs", which allows the player to interact with virtual puppies on the screen, sold 6.65 million units worldwide. Also from the lineup, a new brain training genre, "Brain Age: Train Your Brain in Minutes a Day", coupled with its sequel version, "Big Brain Academy", released only in Japan, brought total unit sales of these three "Touch! Generations" titles during the period to 5.10 million. In addition, "Nintendo Wi-Fi Connection" compatible titles such as "Mario Kart DS", (an action racing game that lets the player compete against other players from around the world) sold 4.22 million units. Also, "Animal Crossing: Wild World", (a game that lets you communicate with friends) sold 3.56 million units.

In the console business, software titles for the "Nintendo GameCube" such as "Mario Party 7" (a get-together game that lets up to eight players play simultaneously) and the role playing game "Pokémon XD: Gale of Darkness" each sold more than a million units, however, overall console hardware and software sales declined.

As a result, consolidated net sales in Fiscal 2006 were ¥508.8 billion (\$4,349 million). Gross margin was ¥215.0 billion (\$1,838 million). The gross margin ratio stayed at 42% compared with the previous fiscal year. Selling, general and administrative expenses amounted to ¥123.8 billion (\$1,058 million). Operating income was ¥91.2 billion (\$780 million). The operating income ratio decreased by 4% compared with the previous fiscal year to 18%. Interest income was ¥22.5 billion (\$192 million), while foreign exchange gain was ¥45.5 billion (\$389 million) due to Japanese yen depreciation. As a result, net income for Fiscal 2006 was ¥98.4 billion (\$841 million). The net income ratio increased by 2% compared with the previous fiscal year to 19%.

Cash Flow

At March 31, 2006, Nintendo's cash and cash equivalents were ¥617.1 billion (\$5,275 million).

Net cash provided by operating activities was ¥46.4 billion (\$396 million) despite reductions in cash due to a foreign exchange gain resulting from revaluation of cash and cash equivalents in foreign currencies, payment of ¥74.9 billion (\$640 million) for income taxes and also due to a decrease in notes and trade accounts payable.

Net cash used in investing activities was ¥208.8 billion (\$1,785 million) as payments into time deposits exceeded withdrawals. Net cash used in financing activities was ¥60.2 billion (\$514 million) due to dividend payments and payments for acquiring treasury stocks.

Financial Position

Nintendo's financial position continues to be very strong.

At March 31, 2006 total liabilities were ¥186.4 billion (\$1,593 million), and the current ratio was 5.59 to 1. The balance of cash and cash equivalents was 3.31 times total liabilities. Working capital was ¥836.5 billion (\$7,149 million). The receivable turnover period increased by 6 days compared with the previous fiscal year to 34 days. Inventories were ¥30.8 billion (\$264 million). The inventory turnover period was 29 days. The debt-to-equity ratio was 0.19 to 1 at March 31, 2006.

Common Stock Activity

During the fiscal year ended March 31, 2006, the Nikkei stock average rose 46% to ¥17,059.66 (\$145.81). The stock price of Nintendo Co., Ltd. ("the Company") rose 50% and ended the year at ¥17,600 (\$150.43). The Company raised its annual dividend level by ¥120 (\$1.03) to ¥390 (\$3.33) per share for Fiscal 2006. On a consolidated basis, the dividend payout ratio was approximately 51%. Foreign shareholders constituted 41% of total outstanding shares at March 31, 2006.

(Note) The amounts presented herein are stated in Japanese yen and have been translated into U.S. dollars solely for the convenience of readers outside Japan at the rate of ¥117 to US\$1, the approximate rate of exchange at March 31, 2006.

Risk Factors

Listed below are the various risks that could significantly affect Nintendo's operating performance, share price, and financial condition. However, unpredictable risks may exist other than the risks set forth herein.

Note that matters pertaining to the future presented herein are determined by Nintendo as of annual consolidated fiscal period ended March 31, 2006.

(1) Risks around economic environment

• Fluctuation in foreign exchange rates

Nintendo distributes its products globally with overseas sales accounting for approximately 70% of total sales. The majority of monetary transactions are made in local currencies. In addition, the Company holds a substantial amount of assets including cash deposits denominated in foreign currencies without exchange contracts. Thus, fluctuation in foreign exchange rates would have a direct influence on earnings not only if foreign currencies were converted to Japanese yen but also if revaluated for financial reporting purposes. Japanese yen appreciation against the U.S. dollar or Euro would have a negative impact on Nintendo's profitability.

(2) Risks around business activities

• Fluctuation of and competition in the market

Nintendo is engaged in a business categorized under the massive entertainment industry. Therefore, the availability of other forms of entertainment affects Nintendo's business. If consumer preferences shift to other forms of entertainment, it is possible that the video game market may shrink. The emergence of new competitors resulting from technological innovation could have a detrimental impact as well.

In the video game industry, it may become even more difficult to generate profit as more research and development expenses and marketing expenses are required and as price competition intensifies with giant enterprises entering into the market. As a result, Nintendo may find difficulty in maintaining or expanding its market share as well as sustaining profitability.

Development of new products

Although Nintendo continues to develop innovative and appealing products in the field of computer entertainment, the development process is complicated and includes many uncertainties. Various risks involved are as follows:

- ① Despite the substantial costs and time needed for software development, there is no guarantee that all new products will be accepted by consumers due to ever shifting consumer preferences. As a result, development of certain products may be suspended or aborted.
- ② Hardware requires a long term development span. While technological advancements occur continuously, it is possible that the Company may be unable to acquire the necessary technology which can be utilized in entertainment. Furthermore, in the case of a delayed launch, it is possible that market share could be adversely affected.
- ③ Due to the nature of Nintendo products, it may become difficult to sell or develop the products as planned which could lead to significant variances from income projections.

Analysis of Operations and Financial Review

• Product valuation and adequate inventory procurement

Demand for products in the video game industry is significantly impacted by consumer preferences as well as seasonality characterized by short product life cycles and very high demand around the holiday season. Although production is targeted at the equilibrium point of supply and demand, accurate projections are extremely difficult to obtain which may lead to the risk of excessive inventory. In addition, inventory obsolescence could have an adverse effect on Nintendo's operations and financial position.

•Overseas business expansion and international activities

Nintendo engages in business in territories such as the Americas, Europe, Australia, and Asia in addition to Japan. Expansion of business to these overseas markets involves risks such as ① unpredicted enforcement or changes to laws or regulations, ② emergence of political or economic factors that prove to be a disadvantage, ③ inconsistency of multilateral taxation systems and diversity of tax law interpretation leading to a disadvantaged position, ④ difficulty of recruiting and securing human resources, ⑤ social disruption resulting from terrorist attacks, war, and other events.

Dependency on outside manufacturers

Nintendo commissions a number of certain outside manufacturers to produce key components or assemble finished products. In the event of their commercial failure, these manufacturers may not adequately provide or produce significant components or products. In addition, certain manufacturers may not have the capacity to provide the ordered amount of components. A shortage of key components could lead to issues such as margin decline due to higher pricing as well as insufficient product supply, and quality control. This may impair the relationship between Nintendo and its suppliers.

Furthermore, as there are many production locations overseas used by our suppliers, when production is interfered by events such as riots or natural disasters at the local area, it could have an adverse effect on Nintendo's operations and financial position.

•Business operations affected by seasonal fluctuation

Since a major portion of demand is focused around the holiday season, the demand is influenced by seasonal fluctuations. Should the Company fail to meet the period of high demand in any of its business activities, including but not restricted to the launch of attractive new products and supplying hardware, it would suffer unfavorable operating performance.

(3) Other risks

Other than set forth above, factors such as product liability, limitations of protecting intellectual property, leakage of personal information and confidential information, changes in accounting standards and taxation system, litigation, uncollectibility of trade accounts receivable and notes receivable, failure of financial institutions, and restrictions regarding environmental protection may adversely affect Nintendo's future performance and financial position.

Report of Independent Auditor

To the Board of Directors and Shareholders of Nintendo Co., Ltd.

We have audited the accompanying consolidated balance sheets of Nintendo Co., Ltd. and its subsidiaries as of March 31, 2005 and 2006, and the related consolidated statements of income, shareholders' equity, and cash flows for the years then ended, all expressed in Japanese Yen. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Nintendo Co., Ltd. and its subsidiaries as of March 31, 2005 and 2006, and the consolidated results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in Japan.

The amounts expressed in U.S. dollars, which are provided solely for the convenience of the reader, have been translated on the basis set forth in Note 1 to the accompanying consolidated financial statements

ChuoAoyama PricewaterhouseCoopers Kyoto, Japan June 29, 2006

Notes to Consolidated Financial Statements

Years ended March 31, 2006 and 2005

Note 1. Basis of Presenting Consolidated Financial Statements

The accompanying consolidated financial statements are prepared from the consolidated financial statements issued in Japan for domestic reporting purposes. Nintendo Co., Ltd. (the "Company") and its subsidiaries in Japan maintain their accounts and records in accordance with the provisions set forth in the Japanese Commercial Code and the Securities and Exchange Law, and in conformity with generally accepted accounting principles and practices in Japan, which are different in certain respects from the application and disclosure requirements of International Financial Reporting Standards. Its overseas consolidated subsidiaries maintain their accounts in conformity with the generally accepted accounting principles and practices prevailing in the respective countries of domicile and no adjustment has been made to their financial statements in consolidation to the extent that significant differences do not occur, as allowed under the generally accepted accounting principles and practices in Japan.

The consolidated financial statements are not intended to present the consolidated financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Japan.

In preparing the accompanying consolidated financial statements, certain reclassifications have been made to the consolidated financial statements issued domestically in order to present them in a form which is more familiar to readers outside Japan.

The consolidated financial statements presented herein are stated in Japanese yen, the currency of the country in which the Company is incorporated and operates. The translations of Japanese yen amounts into U.S. dollar amounts are included solely for the convenience of readers outside Japan and have been made at the rate of ¥117 to US\$1, the approximate rate of exchange at March 31, 2006. These translations should not be construed as representations that the Japanese yen amounts have been, could have been or could in the future be, converted into U.S. dollars at this or any other rate of exchange.

Note 2. Significant Accounting Policies

A. Principles of Consolidation

The accompanying consolidated financial statements include the accounts of the Company and all of its subsidiaries (total 20 in 2006 and 19 in 2005) except for 1 in 2006 and 2 in 2005. The equity method of accounting has been applied to 7 affiliates (out of 8 in 2006 and out of 9 in 2005). The remaining subsidiary and affiliate are immaterial and investments in them are carried at cost in the accompanying consolidated balance sheets.

The principal consolidated subsidiaries and the principal affiliate for which the equity method of accounting was used for the year ended March 31, 2006 were as follows:

Nintendo of America Inc.	Nintendo Australia Pty. Ltd
Nintendo Benelux B.V.	Nintendo of Canada Ltd.
Nintendo España, S.A.	Nintendo of Europe GmbH
Nintendo France S.A.R.L.	
Affiliate	

The amount of consolidated adjustment account is fully amortized in the same fiscal year as incurred.

Valuations of assets and liabilities of consolidated subsidiaries are under market price method.

All significant intercompany transactions, accounts and unrealized profits have been eliminated in consolidation.

The amounts of certain subsidiaries and affiliates have been included on the basis of fiscal periods ended within three months prior to March 31.

Notes to Consolidated Financial Statements

Years ended March 31, 2006 and 2005

B. Translation of Foreign Currency Items

In accordance with the Japanese accounting standard, short-term and long-term monetary receivables and payables denominated in foreign currencies are translated into Japanese yen at the exchange rate in effect at the balance sheet date. The foreign exchange gains and losses from translation are recognized in the statements of income to the extent that they are not hedged by forward exchange contracts.

With respect to financial statements of overseas subsidiaries, the balance sheet accounts are translated into Japanese yen at the exchange rates in effect at the balance sheet date except for shareholders' equity, which are translated at the historical rates. The average exchange rates for the fiscal period are used for translation of revenue and expenses. The differences resulting from translation in this manner are included in "Minority Interests" or "Translation adjustments" in the accompanying consolidated balance sheets.

C. Cash and Cash Equivalents

"Cash and cash equivalents" include cash on hand, deposit which can be withdrawn on demand, time deposit with an original maturity of three months or less and certain investments. Investments are defined as those that are easily accessible, with little risk of fluctuation in value and the maturity date is within three months of the acquisition date.

D. Financial Instruments

Derivatives

All derivatives are stated at fair value, with changes in fair value included in net profit or loss for the period in which they arise.

Securities

Held-to-maturity debt securities are stated at cost after accounting for premium or discount on acquisition, which is amortized over the period to maturity.

Equity securities of non-consolidated subsidiary and affiliated company with equity method non-applied are stated at cost.

Other securities for which market quotations are available are stated at fair value. Unrealized gains on other securities are reported as "Unrealized gains on other securities" in Shareholders' Equity at a net-of-tax amount, while unrealized losses on other securities are included in net profit or loss for the period.

Other securities for which market quotations are unavailable are stated at cost, determined by the moving average method except as stated in the paragraph below.

In case where the fair value of held-to-maturity debt securities, equity securities issued by non-consolidated subsidiary and affiliate, or other securities has declined significantly and such impairment of the value is not deemed temporary, those securities are written down to the fair value and the resulting losses are included in net profit or loss for the period.

Under the Japanese accounting standard, trading securities and debt securities due within one year are presented as "current" and all the other securities are presented as "non-current."

E. Inventories

"Inventories" are stated at the lower of cost, determined by the moving average method, or market.

F. Property, Plant and Equipment

"Property, plant and equipment" are stated at cost. The Company and its consolidated subsidiaries in Japan compute depreciation by the declining balance method over the estimated useful lives. The straight-line method of depreciation is used for buildings, except for structures, acquired on or after April 1, 1998. Overseas consolidated subsidiaries compute depreciation of assets by applying the straight-line method over the period of estimated useful lives. Estimated useful lives of the principal assets are as follows:

Buildings and structures: 3 to 60 years

G. Income Taxes

Deferred income taxes are recorded to reflect the impact of temporary differences between assets and liabilities recognized for financial reporting purposes and such amounts recognized for tax purposes. These deferred taxes are measured by applying currently enacted tax laws to the temporary differences.

The enterprise taxes levied in proportion to added value and capital were recognized as "Selling, general and administrative expenses" effective as of the year ended March 31, 2005

26

H. Retirement and Severance Benefits and Pension Plan

The Company and certain consolidated subsidiaries are calculating the reserve for employee retirement and severance benefits with actuarially projected amounts on the basis of the cost of retirement benefit and plan assets at the end of fiscal year.

Actuarial calculation difference are processed collectively, mainly in the accrued year.

In addition, because the Company's plan assets exceeded the cost of retirement benefits during the current consolidated accounting period, "Reserve for employee retirement and severance benefits" is booked as "Prepaid plan assets" in "Other assets".

From the year ended March 31, 2006, the Company adopted the partial amendment of the Japanese Accounting Standards for Employee Retirement and Severance Benefits. The effect by this application for the year ended March 31, 2006 increased "Income before income taxes and minority interests" by ¥2,677 million (\$22,882 thousand).

At the Annual General Meeting of Shareholders held on June 29, 2005, the discontinuance of the directors and auditors retirement allowance system was approved along with payment of a final allowance to directors and auditors who took office until that time. Since the final allowances are to be paid at the time of retirement based on each director or auditor's tenure as of June 29, 2005, the amount is booked as part of "Non-current accounts payable".

I. Research and Development and Computer Software

Expenses relating to research and development activities are charged to income as incurred.

Computer software for the internal use included in "Other assets" is amortized using the straight-line method over the estimated useful lives.

J. Leases

All leases are accounted for as operating leases. Under the Japanese accounting standards for leases, finance leases that are deemed to transfer ownership of the leased assets to the lessee are to be capitalized, while other finance leases are permitted to be accounted for as operating lease transactions if certain "as if capitalized" information is disclosed in the notes to the lessee's financial statements.

K. Appropriations of Retained Earnings

Appropriations of retained earnings are reflected in the consolidated financial statements for the following year upon shareholders' approval.

L. Per Share Information

The computations of net income per share of common stock are based on the weighted average number of shares outstanding excluding the number of treasury stock during each fiscal year. The average numbers of common stock used in the computation for the years ended March 31, 2006 and 2005 were 128,822 thousand and 131,600 thousand, respectively.

Cash dividends per share represent the amounts applicable to the respective years including dividends to be paid after end of the fiscal year.

Note 3. Supplemental Information on Cash and Cash Equivalents

The balance of "Cash and cash equivalents" includes loans on repurchase agreement secured by marketable securities with a market value of ¥15,939 million (\$136,232 thousand) as of March 31, 2006.

Notes to Consolidated Financial Statements

Years ended March 31, 2006 and 2005

Note 4. Short-term Investments and Investments in Securities

Other securities with market value included in "Investments in securities" as of March 31, 2006 and 2005 were as follows:

	lai	¥ panese Yen in Millions		II S. Do	\$ ollars in Thousands (N	ote 1)

Book value of non-marketable securities in "Short-term investments" and "Investments in securities" as of March 31, 2006 and 2005 were summarized as follows:

	¥ Japanese Yen	in Millions	\$ U.S. Dollars in Thousands (Note 1)
As of March 31,	2006	2005	2006
(1) Held-to-maturity debt securities Commercial paper	¥46,982	¥11,933	\$401,552
(2) Other securities Preferred subscription certificate Unlisted bonds	10,000 6,874	11,000 -	85,470 58,748

The aggregate maturities of Held-to-maturity debt securities in Short-term investments and Investments in securities as of March 31, 2006 and 2005 were as follows:

	Japanese Yen		\$ U.S. Dollars in Thousands (Note 1)
As of March 31,	2006	2005	2006
Due within one year Due after one year	¥64,287	¥20,485	\$549,462
through five years	18,517	24,394	158,263

Proceeds from sales of other securities with market value were ¥13,940 million (\$119,146 thousand) for the year ended March 31, 2006. Gross realized gains and losses on those sales were ¥3,654 million (\$31,229 thousand) and ¥234 million (\$2,000 thousand) for the year ended March 31, 2006.

Investments in unconsolidated subsidiaries and affiliates were ¥6,264 million (\$53,536 thousand) and ¥5,485 million as of March 31, 2006 and 2005, respectively.

Note 5. Derivatives

The Company and certain consolidated subsidiaries enter into foreign exchange forward contracts and currency option contracts. It is the Company's policy to enter into derivative transactions within the limits of foreign currency deposits, and not for speculative purposes.

The Company has foreign exchange forward contracts to reduce risk of exchange rate fluctuations and currency option contracts to reduce risk of exchange rate fluctuations and yield improvement of short-term financial assets.

Foreign exchange forward contracts and currency option contracts bear risks resulting from exchange rate fluctuations. Counterparties to derivative transactions are limited to high confidence level financial institutions. The Company does not anticipate any risk due to default.

Derivative transactions entered into by the Company and certain consolidated subsidiaries are made by the treasury department or the department in charge of financial matters. They are to be approved by the president and the director in charge of those transactions of the Company. Subject consolidated subsidiaries are to report transaction status on a regular basis to the director in charge.

The Company had no derivative contracts outstanding at March 31, 2006.

Derivative contracts the Company had at March 31, 2005 were as follows:

		¥ Japanese Yen in Millions			
As of March 31, 2005	Contract amount	Fair value	Unrealized gain(loss)		
Purchased put options: U.S. dollars Euros	¥23,963 14,177	¥259 55	¥(8)		
Written call options: U.S. dollars Euros	71,890 14,177	442 39	(174) 24		

Notes to Consolidated Financial Statements

Years ended March 31, 2006 and 2005

Note 6. Inventories

Losses incurred from the application of the lower of cost or market valuation of inventories have been charged to "Cost of sales" in the accompanying consolidated statements of income. These losses amounted to ¥6,840 million (\$58,458 thousand) and ¥5,116 million for the years ended March 31, 2006 and 2005, respectively.

Note 7. Retirement and Severance Benefits and Pension Plan

The Company has a tax approved pension scheme and lump-sum severance payments plan which is a defined benefit plan. Certain consolidated subsidiaries have defined contribution plans as well as defined benefit plans. The Company and certain consolidated subsidiaries may also pay extra retirement allowance to employees who have distinguished services.

Retirement benefit obligations as of March 31, 2006 and 2005 were as follows:

	¥ Japanese Yen in Millions		U.S. Dollars in Thousands (Note 1)	
As of March 31,	2006	2005	2006

Undistributed retained earnings of subsidiaries and affiliates	(2,111)	(1,769)	(18,045)
Other	(1,267)	(717)	(10,832)
Total deferred tax liabilities	(10,703)	(7,404)	(91,481)
Net deferred tax assets	¥34,484	¥29,670	\$294,731

Reconciliations of the statutory tax rate and the effective tax rate for the years ended March 31, 2006 and 2005 are omitted, since the difference is not more than five one-hundredth of the statutory tax rate.

Note 10. Leases

The Company and certain consolidated subsidiaries lease computer equipment and other assets. Total lease payments under finance leases not deemed to transfer ownership of the leased assets to the lessee for the years ended March 31, 2006 and 2005 were ¥209 million (\$1,787 thousand) and ¥261 million, respectively.

Pro forma information of leased assets under finance leases that do not transfer ownership of the leased assets to the lessee on an "as if capitalized" basis as of March 31, 2006 and 2005 was as follows:

	¥ Japanese Yen	in Millions	\$ U.S. Dollars in Thousands (Note 1)
As of March 31,	2006	2005	2006
Acquisition cost	¥637	¥827	\$5,443
Accumulated depreciation	310	478	2,652
Net leased assets	¥327	¥349	\$2,791

Pro forma amounts of obligations under finance leases that do not transfer ownership of the leased assets to the lessee on an "as if capitalized" basis as of March 31, 2006 and 2005 were as follows:

¥ Japanese Yen	in Millions	\$ U.S. Dollars in Thousands (Note 1)
2006	2005	2006
¥169	¥207	\$1,437
158	142	1,354
¥327	¥349	 \$2,791
	2006 ¥169 158	¥169 ¥207 158 142

The minimum rental commitments under noncancelable operating leases at March 31, 2006 and 2005 were as follows:

	¥ Japanese Yen	in Millions	\$ U.S. Dollars in Thousands (Note 1)
As of March 31,	2006	2005	2006
Due within one year	¥576	¥573	\$4,928
Due after one year	3,363	3,404	28,741
Total	¥3,939	¥3,977	\$33,669

Depreciation expenses which are not reflected in the accompanying consolidated statement of income, computed by the straight-line method were ¥209 million (\$1,787 thousand) and ¥261 million for the years ended March 31, 2006 and 2005, respectively.

Notes to Consolidated Financial Statements

Years ended March 31, 2006 and 2005

Note 11. Litigation

The Commission of the European Communities announced to impose a fine of EUR149 million on October 30, 2002 referring that Nintendo's past trade practices in Europe until 1998 fell upon "limitation of competition within the EU common market" which is prohibited by Article 81 in the EU treaty.

The Company and its consolidated subsidiary found this fine to be unjustly high and appealed to the Court of First Instance of the European Communities on January 16, 2003. The legal procedure is now under way.

Note 12. Subsequent Events

At the annual general meeting held on June 29, 2006, shareholders of the Company approved the year-end cash dividends and directors' bonuses proposed by the Board of Directors of the Company as follows:

	¥ Japanese Yen in Millions	\$ U.S. Dollars in Thousands (Note 1)
Year-end cash dividends, ¥320 (\$2.74) per share Directors' bonuses	¥40,933 180	\$349,851 1,538

Note 13. Segment Information

A. Segment Information by Business Categories

Because the Company and its consolidated subsidiaries operate predominantly in one industry segment which accounts for over 90% of total net sales, operating income and assets, this information is not required.

B. Segment Information by Seller's Location
